

Response Headers

Global

This table lists the response headers supported by the Web Search API.

HEADER	NAME	DESCRIPTION
X-RateLimit-Limit	Rate Limit	<p>Rate limits associated with the requested plan.</p> <p>An example rate limit <code>X-RateLimit-Limit: 1, 15000</code> means 1 request per second and 15000 requests per month.</p>
X-RateLimit-Policy	Rate Limit Policy	<p>Rate limit policies currently associated with the requested plan.</p> <p>An example policy <code>X-RateLimit-Policy: 1;w=1, 15000;w=2592000</code> means a limit of 1 request over a 1 second window and 15000 requests over a month window. The windows are always given in seconds.</p>
X-RateLimit-Remaining	Rate Limit Remaining	<p>Remaining quota units associated with the expiring limits.</p> <p>An example remaining limit <code>X-RateLimit-Remaining: 1, 1000</code> indicates the API is able to be accessed once during the current second, and 1000 times over the current month.</p> <p>Note: Only successful requests are counted and billed.</p>

HEADER	NAME	DESCRIPTION
		The number of seconds until the quota associated with the expiring limits resets.
X-RateLimit-Reset	Rate Limit Reset	An example reset limit <code>X-RateLimit-Reset: 1, 1419704</code> means a single request can be done again in a second and in 1419704 seconds the full monthly quota associated with the plan will be available again.
